Summer Fun Fact :

Why You Should Get Outdoors

One of the many advantages of sunshine for your health is how well it supports your brain. The benefits of sunshine exposure include a reduction in cognitive loss brought on by ageing and an improvement in cognitive performance. It can enhance the quality of sleep and general brain function when sunlight is used to control the body's natural sleep-wake cycle. The body produces vitamin D in response to the sun's rays, which has been associated with enhanced cognitive performance and a decreased risk of dementia.
